

Syphilis is on the rise in Saskatchewan.

Its symptoms are often invisible.

Babies born with congenital syphilis can be born blind, deaf, and have lifelong problems with their teeth, bones, and joints.

Up to 40% of babies with congenital syphilis die.

You can prevent congenital syphilis.

Test. Treat. Cure.

Stages of syphilis

	Stage 1	Stage 2	Stage 3	Stage 4
Time since infection	3 - 90 days	2 weeks - 6 months	2 - 30 years	10 - 30 years
Symptoms might include:	Sores (often painless or hidden) Swollen lymph nodes	Rash, fever, lack of energy and appetite, sore throat, hair loss, painless sores, headache, hard to see or hear	No symptoms, but damage to nervous system, bones, and organs continues	Serious organ damage, numbness, vision loss, dementia, problems controlling muscles

Get tested. Get treated. Get cured.
