

**Identify the Issue**

**1. What is the injury-related problem or issue that you want to address?**

**Define the problem:**

**2. Who is experiencing this injury in your community?**

**3. When and where are the injuries happening?**

**4. What are the circumstances around the injury? How are they happening?**

**Planning for Prevention:**

5. **Thinking about all of the circumstances around this type of injury, including when, where, and what is happening, what are ways this type of injury can be prevented?**

6. **Who is your target audience for these prevention activities? List your target audiences and what you want them to do (e.g., change behaviour, take action, make different decisions).**

7. **What are some ways that you can reach your target audience to educate them about the prevention activities?**

**8. Identify the resources and partnerships that are already available and identify other resources and partnerships that may be needed for your prevention activities.**

**9. What barriers exist to adopting the recommended prevention activities?**

**10. What are some ways that these barriers can be overcome?**

For more information on Child Injury Prevention, including why children are at risk, influencing public policy, and evaluating your program, download the Child Injury Prevention Programming and Action Guide at <https://skprevention.ca/resource-catalogue/safety/child-injury-prevention-programming-and-action-guide/>.

Create an Action Plan	
<b>Issue</b>	
<b>Prevention Activity</b>
